---

## 1) OpenShot Kya Hai?

- Free & open source video editor.
  - YouTube videos, reels, educational videos, vlogs banane ke liye perfect.
  - Drag & drop editing.
  - Lightweight (low-end PC par bhi chal jata).
- 

## 2) Interface Samajh Lo

OpenShot khulte hi aapko 4 main areas milte hain:

1. Project Files → jaha videos, photos, audio dikhte hain.
  2. Preview Window → video ka live preview.
  3. Timeline → jaha aap clips ko arrange karte ho.
  4. Toolbar → cut, zoom, undo/redo tools.
- 

## 3) Project Start Karna

1. OpenShot open karo.
  2. File → Import Files se video/photo/music add karo.
  3. Drag & drop karke timeline me le aao.
- 

## 4) Video Cut Karna (Scissors Tool)

### Method 1 — Razor Icon

1. Timeline me clip select karo.
2. Razor (cut) tool click karo.

# **OpenShot Video Editor Notes**

**3. Jahan cut chahiye waha click karo.**

**4. Extra part delete.**

## **Method 2 — Right Click**

**1. Clip par right click**

**2. "Slice" → "Keep Left Side" / "Keep Right Side"**

---

## **5) Audio Add / Replace**

**1. MP3 import karo.**

**2. Music ko timeline ke neeche track me drag karo.**

**3. Volume kam/zayada karne ke liye right click → Volume.**

---

## **6) Transitions (Smooth Clip Change)**

**OpenShot me transitions ready-made milte hain.**

**Steps:**

**1. "Transitions" tab kholna.**

**2. Ek transition clip ke beech me drag karna.**

**3. Duration adjust karna.**

**Common transitions:**

- Fade**
  - Slide**
  - Wipe**
  - Circle reveal**
- 

## **7) Titles (Text Likho)**

**1. Title → Title click karo.**

**2. Ready-made templates milenge.**

# **OpenShot Video Editor Notes**

- 3. Text type karo.**
- 4. Save → timeline me add.**

## **Animated Titles**

**OpenShot me Blender use karke animated titles ban sakte hain (optional).**

---

## **8) Green Screen (Chroma Key)**

**Green background remove karne ke liye:**

- 1. Video import karo.**
  - 2. Right click → Properties.**
  - 3. "Chroma Key" search karo.**
  - 4. Color: Green select.**
  - 5. Tolerance adjust.**
- 

## **9) Speed Control (Slow Motion / Fast Motion)**

- 1. Clip par right click.**
  - 2. Time → Speed select karo.**
  - 3. Options:**
    - 0.5x → Slow motion**
    - 2x → Fast**
    - Reverse**
- 

## **10) Zoom In / Zoom Out**

- 1. Clip par right click.**
  - 2. Scale choose karo.**
  - 3. Ya timeline width bar se zoom control.**
-

## 11) Fade In / Fade Out Effects

For Video:

Right click: Fade → Fade In → Entire Clip

For Audio:

Right click: Volume → Fade In / Fade Out

---

## 12) Export (Final Video Banana)

1. Green "Export" button click.
  2. Format: MP4 (recommended)
  3. Preset: YouTube → HD 1080p
  4. Export video.
- 

## 13) Keyboard Shortcuts

- Ctrl + Z → Undo
  - Ctrl + S → Save Project
  - Space → Play/Pause
  - Delete → Remove clip
- 

## 14) Common Problems + Solutions

Lagging timeline

- Preview quality low karo (Settings → Preview Scale).

Audio-video not synced

- Clip properties me "Time" adjust.

Export slow

- Low-end PC: 720p export try karo.
-

## **15) Practice Projects**

- 1. Simple YouTube intro video.**
  - 2. 30-sec reel with background music.**
  - 3. Before/After comparison video.**
  - 4. Slide show with transitions.**
  - 5. Green screen effect mini project.**
- 

## **16) Tips for Professional Videos**

- Background music ko 10–20% volume par rakho.**
  - Text short rakho (1–2 lines max).**
  - Transitions kam use karo (professional look).**
  - Export always MP4 + 1080p.**
-
